Dear Sir/Madam

The National Assembly for Wales is required to conduct the Agricultural and Horticultural Census each year in order to provide important statistical information which is used by farmers, organisations representing the industry and policy makers at local, national and EU level.

Please read the instructions contained within and the **Notes for Guidance on Page Two**. We appreciate it may take some time and effort to get the necessary information together. Please return the form as soon as possible otherwise we will contact you again.

The Agricultural and Horticultural Census is an important source of information used by government, industry organisations, the trade unions, researchers, and other interested parties.

Details of your return are not disclosed outside the National Assembly except in accordance with the provisions of Section 3(2) of the Agricultural Statistics Act 1979.

The information will be used for three main purposes:

- To provide summary statistics on the agricultural work force. These are aggregates of the information collected so that the statistics do not allow for individuals or individual holdings, to be identified.
- Information collected may be used to update the National Assembly for Wales farming register.
- The results may also be used by the Assembly to send you important or beneficial information.

Thank you for your co-operation.

Yours faithfully

Stuart Neil - Agricultural and Rural Affairs Statistician
